WHY REGISTER?

Because no one is completely safe from a serious illness or from a fall.

Because in case of an emergency, the phone may be out of reach.

Because the more tools you have, the safer you will be in case of an emergency. .

Because the family, often far, is concerned about you being alone at home.

Because it is free and takes one call to subscribe.

Pair

A comforting presence!

TO STAY AT HOME WITH MORE REASSURANCE

The PAIR program is a way to live in a community concerned with the well-being of its population..

WHAT IS PAIR?

PAIR is a reassuring service, which allows seniors (s) and persons living alone to feel safe while maintaining their independence . It also helps provide peace of mind for the subscriber's family and friends.

PAIR is a software dedicated to making safety calls.

PAIR can make medication reminder calls.

PAIR has 71 branches throughout Quebec and has more than 3,700 subscribers.

PAIR has received more than 794,000 calls and hundreds of lives have been saved.

HOW PAIR WORKS?

At a predetermined time the subscriber receives the PAIR call.

In answering the call, the system concludes that all is well. In the case that the subscriber does not respond, the computer program makes two (2) other calls.

After these unanswered attempts, an alert is immediately triggered and the respondent is contacted and could go verify with the police if necessary.

If you plan to be away, please advise you local PAIR program agency.

WHO IS PAIR FOR?

For single people (male or female) with or without health problems.

In a couple where one member of the couple has a health problem.

For anyone living a sense of insecurity.

People who have difficulty managing their medications, if available in your area. (This call does not generate alerts)....
